WT/ACC/SPEC/TPKM/6
7 December 1998

(98-4885)

Working Party on the Accession of Chinese Taipei

Original: English

ACCESSION OF CHINESE TAIPEI

CODEX Standards

The following responses to questions raised by some delegations during the Expert Group meeting of 23 July 1998 concerning the adoption of CODEX standards have been received from the Representation of the Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu (hereinafter referred to as "Chinese Taipei").

We note that Chinese Taipei takes into account and adopts Codex standards to allow appropriate level of protection except if there is scientific justification for modification. It is not clear if Chinese Taipei adopts Codex levels by default, e.g. where they do not have a national standard. Is Codex use predominant or does Chinese Taipei mostly develop its own food sanitation standards?

Response by Chinese Taipei:

Chinese Taipei uses Codex standards to develop the food sanitation regulations, either directly or by reference. When there is a need to set up its national standard in Chinese Taipei, the Codex standard is always an important reference and the result of risk assessment determines if the Codex standard is applicable. If the Codex standard is assessed scientifically to be satisfactory to provide sufficient protection of human life or health within the territory, Chinese Taipei will set its national standard the same as the Codex standard. However, necessary modification will be made if the Codex standard is not completely suitable for such protection in Chinese Taipei. Based on scientific principles, Codex standards are adopted as many as possible in Chinese Taipei.

Chinese Taipei affirms that it uses the Codex acceptable daily intake (ADI), gathers residue information based on the use in the country according to good agricultural practice (GAP), and combines this information with a dietary exposure assessment to determine the acceptability of the proposed Codex MRL. However, Chinese Taipei needs to clarify the following points:

In the absence of a Codex ADI, does Chinese Taipei undertake a full toxicology assessment? If not, what ADI is used by default?

Response by Chinese Taipei:

Yes, in the absence of a Codex ADI, Chinese Taipei will undertake a full toxicology assessment to set up ADI.

If the residue data in Chinese Taipei justify a higher MRL to cover their GAP, is such information passed to the FAO/WHO Joint Meeting on Pesticide Residues for review and possible modification of the Codex MRL?

Response by Chinese Taipei:

No, since Chinese Taipei is not a member of United Nations, it is impossible for Chinese Taipei to provide the information to the FAO/WHO Joint Meeting on Pesticide Residues (JMPR). However, Chinese Taipei does not object to the provision of this information to JMPR if suitable arrangements could be made to enable Chinese Taipei to make the direct presentation of the required information.

If Chinese Taipei residue data indicate that the MRL in Chinese Taipei is lower than the Codex MRL and there is no dietary concern, is Chinese Taipei prepared to adopt the "higher" Codex level?

Response by Chinese Taipei:

The Codex MRL will be adopted if it is assessed to be satisfactory.

In referring to the need of an exporting country to set up new MRLs, it is not clear if it is a situation where there is no MRL in Chinese Taipei or if there is a need to revise an existing MRL. We seek confirmation that:

- **where there is no MRL in Chinese Taipei, Codex MRLs would be adopted for current application without further modification;**

- **where there is no Codex MRL, a *de novo* MRL to cover imports would be established.**

Response by Chinese Taipei:

In the document WT/ACC/Chinese Taipei/10, Chinese Taipei referred the need of an exporting country to request to set up new MRLs. Such need actually includes both situations raised in the question, i.e., there is no MRL in Chinese Taipei and there is a need to revise an existing MRL. Where there is no MRL in Chinese Taipei, the Codex MRLs will be used directly or by reference, which is described in the response to question 1. Where there is no Codex MRL, the DOH will establish a new MRL in order to cover the import condition.

Chinese Taipei affirms that it will consider revising MRLs on some crops to allow the facilitation of imports and refers to the "necessary information for review". Could Chinese Taipei indicate how this information package (for both crops and meat) compares to that used within Codex?

Response by Chinese Taipei:

The information required to establish the tolerance of pesticide residues on foods in Chinese Taipei is comparable with the information used within Codex.

While establishing the tolerance of pesticide residues on crops, the following information is required:

For a new pesticide not registered in Chinese Taipei:

- Residue chemistry data:

- Product chemistry data.

- Metabolism in plants and animals.
- Residue field trial data.
- Analytical methods.
- Processing data.
- Feeding studies.
- A full package of toxicological studies.

For a new use of registered pesticide:

- Metabolism in plant.
- Residue field trial data.
- Analytical method.

While establishing the tolerance of pesticide residues on meat, the following information is required:

- Metabolism in plant and animal.
- Analytical method.
- Residue trial data.
- Feeding studies.
- Proposed tolerance.

Chinese Taipei proposes to develop the basic research of pesticides residues in meat products according to the model set for crop products. This model is defined in broad terms in the document, i.e. information on use in Chinese Taipei and residues resulting from this use is gathered and combined with an established ADI in a dietary risk assessment for Chinese Taipei. Chinese Taipei further affirms that where residues are acceptable, an MRL is established which may or may not coincide with a Codex standard. The lack of detail on how the residue studies or the dietary intake analyses are undertaken precludes further analysis of its comparability to Codex. Could Chinese Taipei provide information on how residue studies or the dietary intake analyses are undertaken?

Response by Chinese Taipei:

The procedures to undertake the residue studies or the dietary intake analysis are comparable with those of the FAO guidelines. Two sets of residues data are used for the safety evaluation. One is from crop field trials, and the other is from monitoring program of food products on markets. The former set of residue data together with ADI and the consumption ratio of the commodities is used to establish the MRLs. The latter set of residue data, which is from food products monitored on markets, is used for the practical dietary risk assessment.

According to information available to us, the latest Pesticide Residue Limits in Foods from Taiwan were published in 1993 by the Department of Health, Executive Yuan, R.O.C. (Publication No. 824625, July 7, 1993 - in Chinese, translated by Health Canada staff). Can Taiwan provide a list of the updated MRLs established since 1993 for our reference?

Response by Chinese Taipei:

"Pesticide Residue Limits in Foods" was amended on 28 April 1998 (DOH Food No. 87024451) and "Pesticide Residue Limits in Meat Products" was promulgated on 12 February 1996 (DOH Food No. 85010179). Both are attached as ATTACHMENTS I and II.

We note that most information accessed on DOH's web site is not in a WTO language. Is most information available somewhere else in a WTO language? Does Chinese Taipei have the intention to provide the information in a WTO language on the web site?

Response by Chinese Taipei:

Construction of a DOH's web site is to make food sanitation measures more transparent. The first step is to upload all the information currently available in hardcopies on the web. Most of such information is in Chinese and the target readers are domestic processors and importers. We are also planning to put the English version of food sanitation regulations on the web. It is currently under preparation. Once it is ready, it will be put on the web.

ATTACHMENT I

Pesticide Residue Limits in Foods
DOH Food No. 87024451 Appended and Amended, 04/28/1998

Pesticide Name	Crop Category	Maximum Residue limit (ppm)	Remark
2,4-D	Citrus	2.0	Herbicide
2,4-D	Sugarcane	0.05	Herbicide
Abamectin	Leaf vegetables with wrapped leaves	0.02	Insecticide
Abamectin	Small berries	0.01	Insecticide
Abamectin	Leaf vegetables with small leaves	0.05	Insecticide
Abamectin	Fruit vegetables	0.01	Insecticide
Abamectin	Citrus	0.01	Insecticide
Abamectin	Melons	0.02	Insecticide
Abamectin	Root vegetables	0.01	Insecticide
Acephate	Rice	0.5	Insecticide
Acephate	Other cereals and crops	0.5	Insecticide
Acephate	Pome	0.1	Insecticide
Acephate	Leaf vegetables with wrapped leaves	1.0	Insecticide
Acephate	Leaf vegetables with small leaves	1.0	Insecticide
Acephate	Fruit vegetables	1.0	Insecticide
Acephate	Melon vegetables	1.0	Insecticide
Acephate	Peas and beans	1.0	Insecticide
Acephate	Root vegetables	1.0	Insecticide
Acifluorfen	Dry beans	0.1	Herbicide
Alachlor	Dry beans	0.1	Herbicide
Alachlor	Leaf vegetables with wrapped leaves	0.2	Herbicide
Alachlor	Fruit vegetables	0.2	Herbicide
Alachlor	Sugarcane	0.1	Herbicide
Allethrin	Mushrooms	3.0	Insecticide
Alloxydim (sodium)	Dry beans	1.0	Herbicide
Alphacypermethrin	Fruit vegetables	2.0	Insecticide
Alphacypermethrin	Small berries	2.0	Insecticide
Alphacypermethrin	Citrus	2.0	Insecticide
Alphacypermethrin	Drupe	2.0	Insecticide
Alphacypermethrin	Tea	2.0	Insecticide
Alphacypermethrin	Pome	2.0	Insecticide
Aluminum phosphide	Rice	0.1	Fumigant
Aluminum phosphide	Root vegetables	0.1	Fumigant
Ametryn	Small berries	0.5	Herbicide
Ametryn	Sugarcane	0.1	Herbicide
Amitraz	Pome	0.5	Acaricide
Amitraz	Citrus	0.2	Acaricide
Asulam	Citrus	0.2	Herbicide
Asulam	Sugarcane	0.1	Herbicide
Atrazine	Other cereals and crops	0.25	Herbicide
Atrazine	Large berries	0.25	Herbicide

Pesticide Name	Crop Category	Maximum Residue limit (ppm)	Remark
Atrazine	Sugarcane	0.25	Herbicide
Azinphos-methyl	Small berries	0.5	Insecticide
Azinphos-methyl	Citrus	2.0	Insecticide
Azinphos-methyl	Pome	2.0	Insecticide
Aziprotryne	Leaf vegetables with wrapped leaves	0.2	Herbicide
Azocyclotin	Citrus	1.0	Acaricide
Azocyclotin	Tea	1.0	Acaricide
Azoxystrobin	Small berries	1.0	Fungicide
Azoxystrobin	Melon vegetables	1.0	Fungicide

Vinclozolin	Peas and beans	0.5	Fungicide
Vinclozolin	Small berries	2.0	Fungicide
XMC	Rice	0.2	Insecticide

Note 1: Pesticides not listed in the Table (including those which have not been approved for used by the agriculture authority or those approved for use but no residue is allowed) shall not be detected.

Note 2: Both the MRLs (ppm) and the actually measured residues of pesticides are calculated on the basis of the weights of the produces in the forms on market.

Note 3: The calculation of pesticide residues shall include the pesticide itself and its toxic metabolites.

Note 4: The MRLs of dithiocarbamates are determined as mg CS2/kg and refer to the total residues arising from use of any or each of the groups of dithiocarbamates:

Dimethyldithiocarbamates resulting from the use of ferbam, ziram, metiram, or sankel.

Ethylenebis(dithiocarbamate)s resulting from the use of mancozeb, maneb, zineb, propineb, zinc-mancozeb, or cufraneb.

The use of ETM or thiram.

Note 5: MRLs cover carbendazim residues occurring as a metabolic product of benomyl or thiophanate-methyl, or from direct use of carbendazim.

Note 6: The pesticide MRLs on fruits with specifying pulp or peel is applied to the whole fruit including pulp and peel.

Note 7: Pesticides listed in the Appendix Table 1 are highly safe, and so it is not necessary to set the MRLs and examine their residues.

Note 8: No residue shall be detected for the pesticides prohibited for use by the agriculture authority, unless other regulations apply. The names of such pesticides are listed in the Appendix Table 2.

Note 9: The classification of crops are listed in the Appendix Table 3.

Appendix Table 1

List of Pesticide MRLs Omitted

Name of agrochemical
Bacillus thuringiensis
Blasticidin-S
Calcium Carbonate
Copper Chelate
Copper Oxychloride
Cuprous Oxide
Cupric Hydroxide
Cytokinins
Lime & Sulfur
Nonylphenol Coppersulfonate
Polyoxins
Summer Oil
Sulfur
Tetracycline

Appendix Table 2
Pesticides Prohibited for Use

Name of pesticides
Organic mercury
Endrin
DDT
Heptachlor
Aldrin
Dieldrin
BHC
Leptophos
DBCP
Nitrofen
Chlorobenzilate
Toxaphene
PCP-Na
EDB
r-BHC (Lindane)
MH-30
Dinoseb
Cyanazine
Fenchlorphos
Captafol
Dichloropropane-dichloropropene
Endosulfan
Daminozide
Captan
Folpet

Name of pesticides
Cyhexatin
PCNB
Dinocap
Aldicarb
Dinobuton

Appendix Table 3

Classification of Crops in the Pesticide Residue Limits in Foods

Group	Crop
1. Rice	Paddy rice, dry land rice, etc.
2. Wheat and barley	Barley, wheat, oat, etc.
3. Other cereals and crops	Corn, sorghum, sweet potato, etc.
4. Dry beans	Soybean, peanut, mung bean, small red bean, etc.
5. Leaf vegetables with wrapped leaves	Cabbage, cauliflower, Chinese cabbage, broccoli, lettuce, Brussels sprouts, mustard, etc.
6. Leaf vegetables with small leaves	Chinese mustard, Chinese kale, celery, water spinach, spinach, lettuce, garland chrysanthemum, leaf-beet, garlic, spring onion, Chinese leek, etc.
7. Root vegetables	Radish, carrot, ginger, onion, potato, bamboo shoot, asparagus, co-ba, taro, etc.
8. Mushrooms	Mushrooms, Jew's ear, etc.
9. Fruit vegetables	Tomato, eggplant, sweet pepper, etc.
10. Melon vegetables	Cucumber, bitter melon, luffa, wax gourd, pumpkin, vegetable pear, etc.
11. Peas and beans	Snap bean, snow pea, vegetable soy bean, lablab, asparagus bean, kidney bean, etc.
12. Melons	Watermelon, cantaloupe, melon, etc.
13. Large berries	Banana, papaya, pineapple, kiwi fruit, mangosteen, etc.
14. Small berries	Grape, strawberry, carambola, persimmon, wax apple, guava, etc.
15. Drupe	Mango, longan, litchi, loquat, etc.
16. Pome	Apple, pear, peach, plum, Japanese apricot, cherry, etc.
17. Citrus	Citrus fruit, lemon, pomelo, grapefruit, etc.
18. Special crops	Tea, etc.
19. Sugarcane	Sugarcane, etc.

Attachment II

Pesticide Residue Limits in Meat Products
DOH Food No. 85010179 Announced, 2/12/1996

Pesticide Name	Category	Maximum Residue Limit (ppm)
2,4,5-T	Meat	0.05
2,4,5-T	Edible offal (mammalian)	0.05
2,4,5-T	Milk	0.05
2,4,5-T	Egg	0.05
2,4-D	Meat	0.05
2,4-D	Milk	0.05
2,4-D	Milk product	0.05
2,4-D	Egg	0.05
Acephate	Cattle meat	0.1
Acephate	Cattle fat	0.1
Acephate	Pig meat	0.1
Acephate	Pig fat	0.1
Acephate	Milk	0.1
Acephate	Poultry meat	0.1
Acephate	Poultry fat	0.1
Acephate	Egg	0.1
Aldicarb	Meat	0.01
Aldicarb	Milk	0.01
Aldrin & Dieldrin	Meat	0.2 (fat basis)
Aldrin & Dieldrin	Milk	0.006 (fat basis)
Aldrin & Dieldrin	Egg	0.1
Amitraz	Cattle meat	0.05
Amitraz	Cattle, edible offal of	0.2
Amitraz	Pig meat	0.05
Amitraz	Pig, edible offal of	0.2
Amitraz	Sheep meat	0.1
Amitraz	Sheep, edible offal of	0.2
Amitraz	Milk	0.01
Azocyclotin	Meat	0.2
Azocyclotin	Milk	0.05
Azocyclotin	Milk product	0.05
Bendiocarb	Cattle meat	0.02
Bendiocarb	Cattle kidney	0.2
Bendiocarb	Cattle, edible offal of (except kidney)	0.05
Bendiocarb	Cattle fat	0.05
Bendiocarb	Milk	0.05
Bendiocarb	Poultry meat	0.05
Bendiocarb	Poultry, edible offal of	0.05
Bendiocarb	Poultry fat	0.05
Bendiocarb	Egg	0.05
Carbaryl	Cattle meat	0.2
Carbaryl	Goat meat	0.2
Carbaryl	Sheep meat	0.2

Pesticide Name	Category	Maximum Residue Limit (ppm)
Carbaryl	Milk	0.1
Carbaryl	Milk product	0.1
Carbaryl	Poultry meat	0.5
Carbaryl	Poultry skin	5
Carbaryl	Egg	0.5
Carbendazim	Cattle meat	0.1
Carbendazim	Sheep meat	0.1
Carbendazim	Milk	0.1
Carbendazim	Poultry meat	0.1
Carbendazim	Chicken fat	0.1
Carbendazim	Egg	0.1
Carbofuran	Cattle meat	0.05
Carbofuran	Cattle, edible offal of	0.05
Carbofuran	Cattle fat	0.05
Carbofuran	Pig meat	0.05
Carbofuran	Pig, edible offal of	0.05
Carbofuran	Pig fat	0.05
Carbofuran	Horse meat	0.05
Carbofuran	Horse, edible offal of	0.05
Carbofuran	Horse fat	0.05
Carbofuran	Goat meat	0.05
Carbofuran	Goat, edible offal of	0.05
Carbofuran	Goat fat	0.05
Carbofuran	Sheep meat	0.05
Carbofuran	Sheep, edible offal of	0.05
Carbofuran	Sheep fat	0.05
Carbofuran	Milk	0.05
Chinomethionat	Meat	0.05
Chinomethionat	Milk	0.01
Chlordane	Meat	0.05 (fat basis)
Chlordane	Milk	0.002 (fat basis)
Chlordane	Poultry meat	0.5 (fat basis)
Chlordane	Egg	0.02
Chlorfenvinphos	Meat	0.2 (fat basis)
Chlorfenvinphos	Cattle milk	0.008 (fat basis)
Chlorfenvinphos	Goat milk	0.008 (fat basis)
Chlorfenvinphos	Sheep milk	0.008 (fat basis)
Chlormequat	Cattle milk	0.1
Chlormequat	Goat milk	0.1
Chlormequat	Sheep mili	0.1
Chlormequat	Milk product	0.1
Chlorpyrifos	Cattle meat	2 (fat basis)
Chlorpyrifos	Sheep meat	0.2 (fat basis)
Chlorpyrifos	Milk	0.01 (fat basis)
Chlorpyrifos	Chicken meat	0.1 (fat basis)
Chlorpyrifos	Turkey meat	0.2 (fat basis)
Chlorpyrifos	Egg	0.05

Pesticide Name	Category	Maximum Residue Limit (ppm)
Chlorpyrifos-methyl	Cattle meat	0.05
Chlorpyrifos-methyl	Cattle, edible offal of	0.05
Chlorpyrifos-methyl	Cattle fat	0.05
Chlorpyrifos-methyl	Milk	0.01 (fat basis)
Chlorpyrifos-methyl	Chicken meat	0.05
Chlorpyrifos-methyl	Chicken, edible offal of	0.05
Chlorpyrifos-methyl	Chicken fat	0.05
Chlorpyrifos-methyl	Egg	0.05
Clofentezine	Cattle meat	0.05
Clofentezine	Cattle, edible offal of	0.1
Clofentezine	Cattle milk	0.01
Clofentezine	Poultry meat	0.05
Clofentezine	Poultry, edible offal of	0.05
Clofentezine	Egg	0.05
Cyhexatin	Meat	0.2
Cyhexatin	Milk	0.05
Cyhexatin	Milk product	0.05
Cypermethrin	Meat	0.2 (fat basis)
Cypermethrin	Edible offal (mammalian)	0.05

Terbufos	Cattle milk	0.01
Terbufos	Chicken meat	0.05
Terbufos	Chicken, edible offal of	0.05
Terbufos	Egg	0.01
Thiabendazole	Cattle meat	0.1
Thiabendazole	Cattle, edible offal of	0.1
Thiabendazole	Pig meat	0.1
Thiabendazole	Pig, edible offal of	0.1
Thiabendazole	Horse meat	0.1
Thiabendazole	Horse, edible offal of	0.1
Thiabendazole	Goat meat	0.1
Thiabendazole	Goat, edible offal of	0.1
Thiabendazole	Sheep meat	0.1
Thiabendazole	Sheep, edible offal of	0.1
Thiabendazole	Milk	0.1
Thiophanate-methyl	Chicken meat	0.1
Triadimefon	Meat	0.1
Triadimefon	Milk	0.1
Triadimefon	Poultry meat	0.1
Triadimefon	Egg	0.1
Trichlorfon	Cattle meat	0.1

Pesticide Name	Category	Maximum Residue Limit (ppm)
Trichlorfon	Cattle, edible offal of	0.1
Trichlorfon	Cattle fat	0.1
Trichlorfon	Pig meat	0.1
Trichlorfon	Pig, edible offal of	0.1
Trichlorfon	Pig fat	0.1
Trichlorfon	Sheep meat	0.1
Trichlorfon	Milk	0.05
Vinclozolin	Cattle meat	0.05
Vinclozolin	Cattle milk	0.05
Vinclozolin	Chicken meat	0.05
Vinclozolin	Chicken egg	0.05

Note 1: Pesticides not listed in the Table shall not be detected.

Note 2: Both the maximum residue limits and the actually measured residues of pesticides are calculated on the basis of the weights of the produces in the forms on market.

Note 3: The calculation of pesticide residues shall include the pesticide itself and its toxic metabolities.

Note 4: Offal are such edible parts that fit for human consumption.

Note 5: Maximum residue limits for fat-soluble pesticide residues in milk and milk products are expressed on a whole product basis. For milk product with a fat content lsess than 2 per cent, the MRL applied should be half those specified for milk. The MRL for milk products with a fat content of 2 per cent or more should be 25 times the maximum residue limit specified for milk, expressed on a fat basis. Fat soluble pesticide residues to which the above general provision applies, are indicated by means of the letter "F" in conjunction with the MRL specified for milk.
